

Blind Faith

BRANCHING AND PULL REQUESTS TUTORIAL

As requested, here is a brief tutorial on how to create a new pull request in order to merge your work into the development branch. First of all, [from the repo page](#), click on the branches tab.

You will be presented with the list of branches for the repository. It is pretty brief for now, but it will grow into a long detailed list of branches that identify different features / bugfixes!

Blind Faith

BRANCHING AND PULL REQUESTS TUTORIAL

From here, you should be able of finding your branch, and creating a pull request clicking the grey button on the right. Remember: your branches should always be created using the DEV branch as source.

The screenshot shows the GitHub repository page for `giorgioferri/Blind-Faith`. The 'Overview' tab is selected, displaying a list of branches. The branch `giorgio/documentation/pullRequestTutorial` is highlighted in green, and the 'New pull request' button next to it is circled in red. The page also shows the 'Default branch' as `master` and 'Your branches' including `giorgio/feature/subtitleSystem`, `dev`, and `rafal/feature/characterMovement`. The 'Active branches' section lists `rafal/feature/lightBeam`, `giorgio/feature/subtitleSystem`, `giorgio/documentation/pullRequestTutorial`, `dev`, and `rafal/feature/characterMovement`.

Branch	Updated	Author	Commits	Actions
Default branch				
<code>master</code>	Updated 3 days ago	giorgioferri	0 5	Default
Your branches				
<code>giorgio/feature/subtitleSystem</code>	Updated 18 hours ago	giorgioferri	0 5	New pull request
<code>dev</code>	Updated 21 hours ago	giorgioferri	0 6	New pull request
<code>rafal/feature/characterMovement</code>	Updated yesterday	giorgioferri	0 5	#1 Merged
Active branches				
<code>rafal/feature/lightBeam</code>	Updated 13 hours ago	Rafal2707	0 7	New pull request
<code>giorgio/feature/subtitleSystem</code>	Updated 18 hours ago	giorgioferri	0 5	New pull request
<code>giorgio/documentation/pullRequestTutorial</code>	Updated 21 hours ago	giorgioferri	0 6	New pull request
<code>dev</code>	Updated 21 hours ago	giorgioferri	0 6	New pull request
<code>rafal/feature/characterMovement</code>	Updated yesterday	giorgioferri	0 5	#1 Merged

It is now time to set up your pull request with the right settings.

BRANCHING AND PULL REQUESTS TUTORIAL

The first and most important thing to do is to select what branch you want to merge your work on. It should always be DEV. The base branch is master, so you're going to have to change this every time.

The screenshot shows the GitHub web interface for the repository 'giorgioperr / Blind-Faith'. The 'Pull requests' tab is active. The 'base' dropdown menu is set to 'dev' and is circled in red. The title of the pull request is 'Adding a Pull Request Tutorial document', which is also circled in red. The 'Reviewers' section on the right side of the interface shows two reviewers: 'Rafal2707' and 'flexomatico'. This section is highlighted with a red box. The status 'Able to merge' is visible at the top of the comparison section. The 'Create pull request' button is at the bottom right of the main content area.

Add a clear comment on what you are proposing a merge for. Lastly, add at least two reviewers between Rafal, Felix, and Giorgio. Once the PR is approved by both, it will be merged in the DEV branch!
